or send with payment to Dental Events Pty Ltd,

C/- P.O. Box 8088 LPO North Road,
East Brighton, Victoria 3187

**For further information ring Dental Events (03) 9596 8698
or email tracy@dentalevents.com.au**

Cancellation Policy

Full refunds will be made only when request is received in writing at least 14 days before the seminar. Cancellations cannot be accepted within 14 days of the seminar and no refund will be paid. Dental Events reserves the right to cancel the seminar at any time with no responsibility to applicants other than the full refund of monies paid for the seminar.

Aesthetic Anterior Composite Restorations

Hands-on Workshop Program - SERIES 2
April/May/June 2006

Strictly Limited Attendance - Don't Delay
Maximum of 12 participants per workshop

Dr Eric Tan

BDS (Adele) MDSc (Melb)

Full Day Program

Friday – May 12th
Saturday – June 3rd
8.30am to 4.30pm

Dr Terry Wong

BSc (Hons) Melb BDSc (Melb)

Full Day Program

Saturday – April 8th
Saturday – April 29th
Friday – June 16th
8.30am to 4.30pm

Full Day Hands-on Workshop Program

Colour Science and Direct Restorative Materials

Your Trainer

Dr Eric Tan graduated from dentistry from the University of Adelaide and shortly thereafter completed a Masters degree in Prosthodontics from the University of Melbourne. Eric is actively involved in continuing education, and has lectured throughout Australia and internationally on topics relating to implant dentistry, aesthetics, adhesion, occlusion and ceramics, and has published articles relating to these topics. He is involved in the clinical teaching of fixed prosthodontics at the University of Melbourne Dental School and maintains a Private Specialist Prosthodontic Practice in Toorak, Victoria, with an emphasis on aesthetics and inter-disciplinary case management.

Workshop Program

Aesthetic treatment outcomes have become an increasingly important factor in overall case success. This is largely due to an increasing awareness amongst patients about dental aesthetics. Dental aesthetics and smile design can be broken down and discussed as 2 factors - form and colour.

This program will cover the basics of aesthetic smile design and the science of colour and its application to shade selection and material selection in clinical dentistry.

Modern direct composite restorative materials will be discussed, as well as the benefits of adopting a multi-shade system to achieve more consistent aesthetic results. Clear criteria will be presented as to when a single shade restoration is sufficient and when a more complex multi-shade build-up is indicated.

Clinically relevant information will be presented pertaining to preparation design, application of layers and occlusal considerations. Techniques to simplify multiple single-shade restorations will also be discussed.

A two hour didactic lecture will be followed by a hands-on workshop.

Workshop Objectives

- Learning the science of colour.
- Techniques for shade selection.
- Understanding smile design.
- Recognising when you need to use 1, 2 or more shades of composite to achieve acceptable aesthetics depending upon the clinical situation.
- Principles of preparation design in anterior Class IV restorations.
- Learning multi-layering techniques for direct restorations.
- Learning techniques to generate predictable interproximal contacts between restorations and to allow ease of separation.
- Discuss nanocomposite technology.

Cost: \$695.00 (inc GST)

Full Day Hands-On Workshop Program

Re-Creating Smiles in Composite Resin – A Hands-on Approach

Your Trainer

Terry Wong graduated with a BSc from Melbourne University in 1981, before working as a Graduate Research Scientist in the Dept. Medicine, at Melbourne University. He graduated from Melbourne University School of Dental Science in 1987 and maintains a general practice in Kew, Melbourne, with emphasis on Aesthetic Dentistry. He has completed studies at the Las Vegas Institute of Advanced Dental Studies in 1999, receiving hands-on instruction from Dr. William Dickerson and Dr. Ronald Jackson. In 2000, he attended the Fahl School of Art and Science in Aesthetic Dentistry (Curitiba, Brazil) and received personal tuition from Dr. Newton Fahl.

Workshop Program

This is a concise, one day course focusing on the value and understanding of direct composite resin veneers. A two hour lecture will be followed by a hands-on approach on a diagnostic model. You will learn how to artistically apply composite resin to mimic tooth morphology. You will be taught how to manage almost every case of poor Dental Aesthetics with direct composite bonding, understanding how composite resin can be a beautiful alternative to ceramic veneers, while being conservative and brilliantly aesthetic.

You will be able to return to your clinics and immediately put into practice with confidence the skills acquired from the workshop. You will learn how to treatment plan a wide range of cases of poor dental aesthetics and provide a solution in a single appointment. Your patients will appreciate that you can offer a broader range of treatment options to enhance poorly aesthetic teeth. In return, you will achieve immense personal satisfaction in being able to control the case from start to finish, in delivering to your patient, a beautiful smile.

Workshop Objectives

- Learning the principles of an aesthetic smile
- Understanding the tooth preparation required for direct resin veneers
- Learning the layering technique of composite resin to achieve natural aesthetics
- Knowing what armamentarium is required for optimal handling of resin
- Discussing the finishing aspects to achieve long lasting aesthetic restorations
- Using mock-ups in case diagnosis and treatment planning
- Marketing direct resin veneers in your practice
- Discuss nanocomposite technology

Cost: \$695.00 (inc GST)
