

"The idea was to develop a system with two different masses which replace and demonstrate the optical characteristics of dentin and enamel. A concept following the natural layering concept. It is probably the closest synthesis of nature's perfection among direct restorative materials"

Dr. D. Dietschi, Switzerland

Esthetic clinical success using Miris2 composite

Case 1

Case 2

Case 3

"The following three clinical cases demonstrate the success achieved when applying the shade selection principals of Miris 2. The various dentine and enamel shades of Miris can be combined to simulate natural aesthetics. The end result of using Miris 2 are natural looking teeth."

Dr. Terry Wong
Melbourne, Australia
