Theme: Advances in Aesthetic Dentistry

This year's conference features a comprehensive 3 day programme designed to broaden your treatment options and improve your capability to provide the best functional and aesthetic dental restorations.

Featuring some of the world's finest dental professionals who will provide you with the latest insights into materials, techniques, trends and the systems available to create optimal aesthetic restorations.

With an increasing demand for highly aesthetic implant supported dentures, for the first time this event will cater for Dental Prosthetists with specialist lectures and workshops offering advanced skills in removable prosthetics.

The symbiotic relationship between dentist and technicians can never be undervalued. Throughout this conference you will learn how to approach problems from this team-based perspective which is fundamental in creating ideal dental solutions. We also attract many auxiliary staff who benefit from learning tips and tricks for handling the latest materials and understanding new techniques.

Additional highlights not to be missed:

- Welcome cocktail party on Wednesday night
- Dinner and entertainment on Thursday night at the Salt House Restaurant, situated at Marina Point
- Friday is a free day for you to explore everything that Cairns and Tropical North Queensland has to offer
- Farewell Gala Dinner on Saturday night at a yet to be announced location

Request a full conference programme **CALL 1300 486 2527**

Programme at a glance
