Ivoclar Vivadent reserves the right to change course dates and venues or cancel the course altogether. If a course is cancelled, a full refund will apply.

Posterior Composites – Technique for Achieving Maximum Aesthetics

The placement of direct posterior composite restorations can be difficult. The dentist requires an understanding of both bonding and shade determination along with handling, shaping and polishing the material. When restoring proximal surfaces, achieving an adequate contact point can often be a challenge.

Dr. Terry Wong addresses these issues and equips the dentist with the skills to achieve durable and aesthetic results by adopting a simplified approach, with fewer instruments.

On completion of this course, participants will be able to:

- Competently select shades for posterior composite restorations
- Reduce post-operative sensitivity with bonding
- Achieve occlusal anatomy and tight contact points
- Minimise occlusal adjustments
- Understand which instruments to use
- Refine the skills of shaping, finishing and polishing of composites

Anterior Direct Bonding – A Simplified Approach

Dr Terry Wong presents a morning lecture that highlights the important aspects of smile design. Participants will gain an understanding of how to select shades of composite and then manipulate and place layers of different shades of composite to produce an improved aesthetic outcome.

An afternoon hands-on program focuses on the direct placement of composite resin for the correction of aesthetic issues ranging from mis-shaped and misaligned teeth.

On completion of the course, participants will be able to:

- Improve his/her skill on direct composite resin veneers
- Gain a better understanding of colour and how to select the appropriate shades of composite and manage discoloured teeth
- Refine the skills of shaping, finishing and polishing of composites

Dr. Terry Wong

B.Sc. (Hons) Melb., B.D.Sc. Melb

Dr. Terry Wong lectures internationally on the topic of composite resin restorations. Presently, Dr. Wong lectures at Melbourne University on the topic of Aesthetic Dentistry and conducts hands-on programs about free handed delivery of composite restorations.

He attended the Las Vegas Institute and studied occlusion at the Kois centre in Seattle. He has been personally instructed by Dr. Newton Fahl of the Fahl School of Art and Science in Aesthetic Dentistry in Brazil. Dr. Wong obtained his degree at Melbourne University in 1987 and maintains a general practice in Melbourne with emphasis on restorative dentistry.

"Dr. Terry Wong is a dentist with a lot of passion for dentistry. His skills and open-minded approach to conservative dental treatment grant him the ability to be an excellent restorative dentist with composite resins – one that would be worth learning from."

Dr. Newton Fahl D.D.S., M.S.
